REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art fails to show or fairly teach an ice door with an integral heater around the periphery which is separated by insulation from the central portion of the door. Unger shows a heater for a peripheral edge of an ice door to prevent the door from freezing closed, but the heater is located in the liner of the refrigerator, not the door. Schmidt shows a heater in an ice door, but the heater covers the entire surface of the door with no insulation between the heater and the surface of the door. There is no teaching to combine the references. Jacobus et al (6,533,003) states in lines 26 and 27 of column 3 that a heater can be placed in the peripheral region of the ice door. However, Jacobus was filed on the same day as the current case by the same assignee. The peripheral heater is not claimed in the Jacobus et al case.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
